Introduction — The Crossings

Between 1882 and 1915, eight people left their homes in Ireland, Norway, and the Czech lands. They crossed the Atlantic on steamships — the Kronprinz Wilhelm, the Caronia, the Ivernia, the Arabic, the New York. They carried almost nothing. They knew almost no one.

They all ended up in Chicago.

Over three generations, their families converged — on the same streets, in the same parishes, at the same stockyards and railroad yards. An Irish cop's granddaughter married a Norwegian servant girl's grandson. A Kerry farmer's son raised his family one block from a Cork immigrant's boy. Two Czech teenagers who sailed on the same famous ship a decade apart found each other in Pilsen.

The O'Reilly family came from Meelin parish, near the town of Newmarket in County Cork. Knockahely and Knockdaff — the townlands of Michael O'Reilly and Ellen Ryan — are neighboring farming communities in the rolling hills of north Cork, near the borders of Counties Limerick and Kerry. The area was heavily affected by the Great Famine (1845-1852) and the Land War (1879-1882).

he took the farm's name as his own. The servant girl's son became Andrew Olaus Linnerud.

Albert — Killed in the Storm

Albert S. Linnerud was 20 years old and working as a printer in Chicago when he was killed on June 4, 1933. The Belvidere Daily Republican: "KILLED IN STORM" — Albert died when a factory wall collapsed during a violent storm. His gravestone says simply: SON.

610 feet long — longer than two football fields. Armed with 5-inch naval guns, twin 40mm anti-aircraft guns, and 20mm guns. Designed to carry 5,000 troops. Coast Guard-manned. Commissioned January 24, 1945.

The Plane Crash — March 25, 1945

Two weeks after Lyle came aboard, a Navy pilot decided to put on a show — aerobatics over the ship at Manus Island, Papua New Guinea. During a loop, he lost control. Rather than crash into the main deck where hundreds of soldiers stood watching, the pilot nosed the plane into the ship's side. Both

occupants of the plane were killed. One man died on the ship. Five more were wounded. Lyle hadn't even left port yet. He still had 85,000 miles ahead of him.

The Floating Mine

Somewhere in the Pacific, the bow lookout spotted it: a floating contact mine. The helmsman swerved. The 40mm gun crew detonated it at a safe distance. Five thousand troops never knew how close they came.

He died August 29, 2015 — one day before his 93rd birthday — and was buried with full military honors at Abraham Lincoln National Cemetery.

Research Methodology

- 1. Start with known facts:** Dave provided family documents (Lyle's memoir, eulogy, In Loving Memory cards, family photos). These established the known family structure.
- 2. Census triangulation:** Each person was tracked across multiple U.S. Census years (1900-1950). Names, ages, birthplaces, addresses, and occupations were cross-referenced to confirm identity. When a person appears at a consistent address with consistent family members across 2-3 census years, identity is considered confirmed.
- 3. Ship manifest matching:** Immigration records were matched by name, age, origin town, and destination. Where available, physical descriptions (height, hair, eyes) were cross-referenced with draft cards.
- 4. Irish/Norwegian primary records:** For Irish ancestors, the 1901 and 1911 Irish Census provided household-level detail. For Norwegian ancestors, the Digital Archives of Norway provided baptism, confirmation, and census records going back to the 1700s.
- 5. Military record verification:** Draft cards provided physical descriptions, addresses, employers, and next-of-kin that could be cross-referenced with census data. Ship histories were verified through official Coast Guard publications and NavSource.
- 6. Death/burial verification:** Find a Grave memorials, obituaries, and death certificates provided death dates, burial locations, and surviving family members that confirmed family connections.
- 7. Family oral history:** Where noted, information provided directly by Dave O'Reilly is labeled as such. Family oral history is valuable but marked separately from documentary evidence.

Total Document Count

133 primary source documents were collected, organized by family line, and preserved as screenshot images. These include census pages, ship manifests, draft cards, marriage records, death records, obituaries, gravestone photos, church records, and family documents.

Connection Confidence — Every Link Explained

Below is every major connection in the family tree, how it was established, what evidence supports it, and the confidence level.

Confidence Scale: **HIGH** = Multiple independent primary sources confirm. **MEDIUM** = Supported by one primary source + circumstantial evidence. **UNVERIFIED** = Family oral history only, no documentary proof yet found.

O'Reilly Line Connections
